

TruDonor ID™, Biometric Donor ID Service

Blood Centers Can Quickly Deploy This Fully Hosted, Managed and Maintained ID Solution

PRODUCT OVERVIEW

TruDonor ID is a secure web-based service that uses finger biometrics to positively identify blood donors. This SaaS (Software as a Service) is hosted and fully managed by BIO-key and provides a "turnkey" application with easy, same-day deployment. TruDonor ID enables blood centers of any size to quickly, conveniently and positively identify donors.

Biometric Donor Identification

Accurately identify donors without requiring them to produce IDs or remember donor ID numbers. Eliminate the time and errors associated with your staff validating identities and manually entering information. TruDonor ID virtually eliminates the potential of accidental or intentional duplicate donor IDs. This cost effective solution reduces the risk of misidentifying donors and ensures against unnecessary and costly processing of deferrals.

TruDonor ID

- Eliminates costly IT expenditures on equipment, staff and maintenance
- Provides 24/7 monitoring & support by expert technicians
- Delivers instant and secure access to your database, leveraging BIO-key's award winning identification software.
- Significantly reduces deployment costs & time

TruDonor ID can interface to your legacy Donor ID Application or run as a standalone solution, delivering superior speed, convenience and accuracy at a fraction of the cost and time required to implement a traditional alternative.

FEATURES

Lowers IT Costs While Delivering Economies of Scale

When you subscribe to TruDonor ID, you avoid overhead, hardware and software costs associated with a conventional identity solution. This allows your staff to focus on the core mission of your organization. With BIO-key's ID solution, your subscription costs take advantage of the economies of scale achieved by multi-tenancy with other blood centers running the same application, but on their own, secure dataset. This makes your solution scalable at a far lower cost.

Pay as You Go and Save Time

An on-going quarterly expense is often easier to incorporate into your budget than a large, one time outlay. When you subscribe to TruDonor ID, you pay an annual subscription fee that reflects your agreed upon usage. By eliminating the typical implementation learning curve associated with installing a licensed software solution, deployment times are far shorter and you can easily expand as needed.

Free Up Your IT Staff and Gain Fast Access to the Latest Innovations

With TruDonor ID, your organization is free from supporting high cost, time consuming IT functions including:

- Purchasing & supporting the server infrastructure necessary to install and maintain software in-house.
- Providing equipment redundancy and the necessary security, reliability and scalability to run the application.
- Maintaining upgrades. Unlike traditional software license upgrades, you benefit from innovations on an ongoing basis without your staff having to dedicate time, resources and costs to install new versions.

Key Benefits

Fast, Secure Identification

- *Easy & fast to deploy, no IT or technical staff needed*
- *Donor ID information is secure in your database*
- *Streamlines donor check-in & workflow, eliminates errors*
- *Training & support included*

Saves Time and Money

- *Turnkey- no new hardware, IT staff or security infrastructure necessary*
- *Subscription service- requires no large capital outlay and no long term commitment*

Superior Technology

- *Award winning software delivers fast, 'one to many' matching*
- *Integrates to existing systems or operates as a standalone solution*
- *Simple, secure web-based deployment, can be accessed anywhere and anytime*
